

# Hanger-Type Air Sterilizer

[ DNT-H-001-M ]

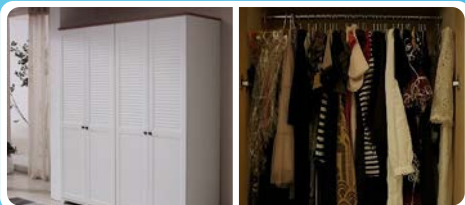

**Change an environment for the health of our family.**

Homes / hotels / pensions / clothing store showcase / office cabinets

**DNT-H-001-M is recommended for a place like this.**

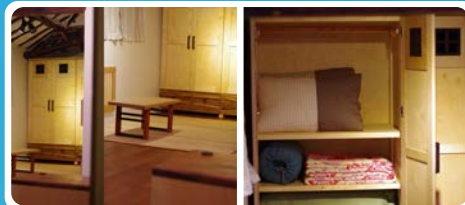

**Aircop**

## | In General Homes

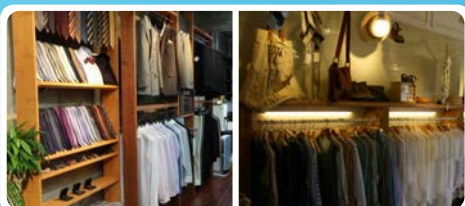

► If installed in a master bedroom or children's bedroom, the product will prevent the entry of pests in the closet. It has a superior dehumidifying effect during the rainy seasons and thus enables family's clothes to be kept neatly.

## | In Hotels and Pensions

► If used in hotels' guest rooms and pensions, the product will have an excellent pest prevention effect and an effective dehumidifying effect on duvets and pillows as well as clothing, so that more comfortable environment and the differentiation of the guest rooms can be promoted.

## | In Stores

► If installed in the store showcases and display-purpose furniture, the air dehumidification and deodorization as well as the powerful sterilization will make displayed clothes kept in better and more effective condition.

## | In Offices

► If installed in your office or a wardrobe in the dressing room, the employees can keep suits and other clothing more neatly and contribute effectively to corporate welfare.

A Company Containing  
and Resembling Nature

**DNT Co., Ltd.**  
DESIGN & TECHNOLOGY

## ■ The main function of the product

Aircop

### | Pest Repellent Function

- ▶ Because our product is the nation's first pest repellent material extracted from plants and uses specifically designed plastics of a pest prevention character, they can avoid pests without further actions.
- ▶ Since we use a natural substance in the plastic, unlike the products of other companies which uses chemicals in the plastic, our products are harmless to a human body.

### | Dehumidification Function

- ▶ The product has excellent dehumidification by perlite applied to a device.

### | Sterilization Function

- ▶ Powerful air sterilization by a wavelength of 253.7nm UV-C through UV LAMP is possible.
- ▶ Prominent effects on most microorganisms such as bacteria, spores, viruses, protozoa, nematodes' eggs, algae, etc.

### | Deodorizing Function

- ▶ Driving built-in blower fans induces air circulation and deodorization.

Aircop
